Company Overview

B-Three Solutions is a Pittsburgh-based software development company that works to provide Business Improvement, Business Integration, and Business Intelligence through software. B-Three boasts a growing team of over 30 IT professionals, and a portfolio of expertise in a variety of industries, including healthcare, manufacturing, technology, government, law enforcement, finance, and telecommunications. Established in 2006 with only 8 full-time employees, we've grown substantially over the past decade. We assist medium-to-large organizations to align their business goals, processes, and technology by proposing solutions that are consistent with business logic and justified by cost-effectiveness. B-Three's design-driven, business-focused approach to IT projects maximizes the return on client investment. We base our methodology on the two fundamental assumptions of a fixed-fee cost structure and a fixed timeline. Qualifying as a "small business," we are open to subcontracting opportunities available under larger companies.

Core Competencies

- Custom Software Development
- Oracle & SQL Server Database Design
- Data Warehousing (.NET Stack & Java)
- COTS Customization
- Mobile Applications (iOS/Android)
